Quality Control

Quality is of the utmost importance to the standard of the product, ourselves and above all our customer. To ensure this we have many procedures in place that follow stringent guidelines.

SQF Quality Control

Tasty Chips is SQF 2000 HACCP Quality Certified Supplier. Consumers throughout the world are demanding safe quality food. The SQF 2000 system is a HACCP management system that encapsulates NACMCF and CODEX HACCP Principles and guidelines. SQF 2000 enables a business to demonstrate that they can supply food that is safe and meets the quality specified by a customer. The SQF 2000 is designed to offer benefits to business at all links in the food supply chain. Products produced under the SQF 2000 system retain a high degree of acceptance in the marketplace. SQF 2000 system ensures that product is traceable from the producer to the consumer.
